

# nexisys

single entry to multiple  
Insurance Co. Website

**Entering data is not difficult. But entering data several times on several systems in order to do one insurance transaction is frustrating. Sadly, it also seems to be becoming more and more common.**

That's why Keal has brought you **Nexisys**. This powerful tool eliminates the re-keying of information you have already entered into your broker management system by letting you click one button to populate fields on an Insurance Carrier's web portal. Using a true, real-time tool with single sign-on, Nexisys finally delivers on the single entry, single interface mission.

**Nexisys** uses very advanced technologies and, while complying with both CSIO and Accord standards, it empowers brokers to handle new business, renewals and policy change transaction for both personal auto and habitational insurance, as well as claims and billing inquiries, all from the single click of a button.

What makes it even better is that all of these functions are available without the Carrier\* having to make any changes to their existing web portal solution.

- Reduce errors caused by re-keying data.
- Reduce the learning curve associated with each Carrier's web portal.
- Realize productivity increases because of the efficient workflow.
- Simplify how your Brokerage handles information.

Nexisys can connect to web services, faxing solutions, email systems and HTTP/SSL technologies which means that information can flow many directions, easily. Nexisys is a quiet hero that invisibly moves data quickly, and without fanfare. Its power lies in the simplicity that it delivers to your office.

Our advanced technologies allow Nexisys to stay up to date with changes that Insurance Carriers might make to their portal tools simply by running a utility that ships with the technology.

Nexisys can connect independently to virtually any broker management system. But for the best results, vendors are encouraged to implement Nexisys into their solutions.

Moving information from your fingertips, to your Insurance Companies' systems can finally happen - quickly, quietly, simply.

\* Assumes the insurance carrier must have a web portal offering personal auto, habitational, claims and billing data.

## Solution Overview

- Reduce errors caused by re-keying data.
- Reduce the learning curve associated with each Carrier's web portal.
- Realize productivity increases because of the efficient workflow.
- Simplify how your Brokerage handles information.
