

Hear what our clients are saying about sigXP™ !

“We have been a loyal Keal client for over 15 years. After purchasing a brokerage on an alternative Broker Management System, we soon realized the strength of sigXP and began the process of converting our entire operation over to sigXP. sigXP is very intuitive and more flexible, allowing us to centralize client information and enabling greater ease of account handling. Its features far outweigh the competition. Although many of the BMS' in the market place may appear to be similar, it really does come down to the small things that improve workflow efficiencies - Keal understands this and delivers it in sigXP.”

Rick Dresher, B.Comm., Msc.Pl., CRM, CAIB
President
Affiliated Insurance Management Inc.

“With the advent of sigXP and dokXP, gone are the days of paper files, T-filing, and snail mail! Our team simply love it. Information is literally at their fingertips: a mouse click away. Furthermore, integrated quoting and electronic policy upload reduce quoting time allowing for prompt delivery of our products to our clients. sigXP allows us to generate and print customizable reports in real time, accommodate branch office setup, and reassign accounts and policies to a new rep within minutes. New employees comment positively on sigXP's features compared to their previous Broker Management System. The Keal team is approachable and have a listening ear when it comes to our recommendations on improving the product.”

Louise King, CAIB
